ONE HUNDRED MILLIONS.

J. J. Valentino, General Superintendent of Wells, Fargo & Co., publishes the annual statement of the production of precious metals in the States and Territories west of the Missouri river, including British Columbia and the west coast of Mexico during 1875, which shows the aggregate yield to be \$80,889,037, being an excess of \$6,487,982 over 1874, the greatest provisions yield in the history of the coast. Nevada, Colorado, Mexico, Oregon, British Columbia, Montana and Arizona have increased. California, Idaho, Utah and Washington Territory have decreased. The increase is actual, except for Mexico, Arizona and Oregon, where it is apparent rather than real as compared with other years, the regular product being accounted for and reported, but hitherto omitted. The decrease in California is in the main occasioned by the stinted supply of water for placer and hydraulic mining. The present prospect indicates an aggregate yield of \$90,000,000 for 1876, of which Nevada will doubtless produce \$50,000,000. This exhibit of our brilliant product for the past year is extremely gratifying considering the hardships that have been inflicted upon us. But we are not satisfied with the estimate for the year upon which we have hardly fairly entered. And we have the best of reasons for surmising that the product will be ten millions more than has been calculated upon by Mr. Valentino. In this Centennial year we ought to be content with nothing less than an even hundred millions. It would be singularly fitting and peculiarly appropriate that the country should make itself such a handsome Centennial birthday present. Of this amount we believe that Nevada can and will contribute six-tenths. We expect at least one-half of this will be furnished by two mines—Consolidated Virginia and California—and we will be out of luck if the rest of the Comstock and the remainder of the State does not make up the deficit. The indications now clearly point to the bringing about of such a desirable state of affairs.

BOARD OF TRADE.

In another place we publish the objects and purposes of a proposed Board of Trade, about to be permanently organized in this town. We are heartily in favor of the projected movement. Unless we should indulge in what many would term dreams of a fevered imagination it would be impossible to present to our readers the manifold benefits to be derived from an institution of the character mentioned if properly conducted. The platform of principles enunciated cover the whole ground. It only needs that they shall be taken up as they rank in importance, and the outside world made fully acquainted with our advantages to insure us an immense population, and a happy and prosperous community. The Journal has done much to bring into prominence the varied resources of this town and county, and our labor has not been expended in vain. But a Board of Trade, in perfect working order, and with its members thoroughly alive to the importance of their actions, can do a great deal more than any single individual or newspaper. Its sphere can be enlarged to such a degree of usefulness that its disappearance would furnish cause for great regret and sorrow. But the work laid out by our Reno Board of Trade is a herculean task. Every member must put his shoulder to the wheel and push forward with all his might. The result will be that in a few years Reno will be the largest city in Nevada, and Washoe the first instead of third county in population and wealth. But let us bear in mind that in unity there is strength, and that a child can break the sticks if they are taken from the bundle.

A glorious sunset at Austin is described by the *Reveille* as resembling a ripe pumpkin wrapped in the American flag.

RENO BOARD OF TRADE.

Important Meeting of the Principal Business Men—The Initiative Taken Toward Establishing a "Board of Trade"—A Want Long Needed to be Supplied—A Good Move for Reno and Washoe County.

A very important meeting of some of the principal business men of Reno was held at the Court House on New Year's Day. Mr. A. J. Hatch was elected as Chairman of the meeting, and succinctly stated the purpose for which it had been convened together. Nothing more nor less than a "Board of Trade" for this town and county. Mr. Hatch presented his views on the question, and other gentlemen, including Jas. H. Kinkaid, W. M. Boardman, B. B. Norton, W. Webster, W. L. Knox, J. C. Lewis fully concurred in all the ideas promulgated by Mr. Hatch, and advanced suggestions of their own, which confirmed and fully recognized the advantages sure to accrue to Reno and Washoe county. After an interchange of opinion, definite measures were taken for instituting the enterprise, which resulted in the adoption of a Constitution, which reads as follows:

"We, the citizens of Reno and Washoe county, whose names are hereunto annexed, believing that through united action, we can secure to ourselves certain benefits, which can not be done through individual effort, and being desirous of cultivating friendly relations between ourselves in business affairs, as well as in all other respects, and believing it to be our duty to promote the common welfare of the community, and especially the welfare of the rising generation who are soon to fill the stations in life which we now occupy, and believing that we should make the best uses of the abundant means which surround us especially of our beautiful climate, our prolific soil, our stores of mineral wealth, and to many other blessings which a kind Providence has vouchsafed to us; Therefore, do we, of and among ourselves, on this first day of January of the Centennial year of our National Independence, A. D. 1876, form this association, and do hereby adopt the following Constitution for our Government:

This organization shall be known as the Reno Board of Trade.

Its objects and powers shall be:

To promote a location.

To establish a public library.

To procure lectures upon useful scientific subjects.

To devise the best means of providing ample public school facilities.

To encourage manufactures and industrial pursuits, and promote the advantages of one water power for manufacturing purposes.

To disseminate facts concerning the value and adaptation of our soil and climate for agricultural, horticultural and pomological purposes.

To encourage the development of mines, and the construction of reduction works in our immediate vicinity.

To invite immigration.

To consider the condition of our county roads, and the thoroughfares leading to our town from distant points, and to provide means for their improvement by legislation, or other action.

To determine the best means to secure our town from destruction by fire.

To take such action as will tend to preserve the purity of water in the Truckee river, and prevent the destruction of fish.

To point out defects in existing laws and to recommend their amendment or repeal, and to recommend the passage of new laws.

To consider the financial condition of the county, and to discuss and recommend such action as will tend to secure an economical disbursement of the county funds, and a lower rate of taxation.

To discuss affairs of commerce and trade, and all such subjects as have reference to the present and future welfare of our town and county.

No political or sectarian questions shall be discussed or considered by the Board.

The Board may incorporate under the laws of the State.

All property owners within the town and county may become members on being elected by a vote of two thirds of the members of the Board present, paying the required fee, and signing this Constitution and by laws.

The members of the Board shall

pay such an admission fee and such dues per month as may be prescribed in the by laws.

Members may be expelled for sufficient cause.

The officers of the Board shall consist of a President, three Vice Presidents, a recording Secretary, a corresponding Secretary, a financial Secretary, a Treasurer, a Sergeant-at-Arms, and such other officers as may be required.

All officers shall be elected by ballot, and shall hold their offices for the period of one year, and shall be elected at the last regular meeting in December of each year.

The following named Committees, consisting of three members each, shall be appointed by the President, and shall serve for one year: A Committee on By Laws; Education; Manufactures and Industrial pursuits; Mines and Mining Interests; Agricultural; Immigration; Roads and Thoroughfares; Safety from Fire; Municipal Government; Purity of Water and Preservation of Fish; Taxes and County Funds; Trade and Commerce; Judiciary; Printing; Executive.

By-laws may be framed by the Board which shall conform to and be consistent with this Constitution.

This Constitution may be altered or amended by a two-thirds vote of the members present at any regular meeting; provided, notice of such alteration or amendment shall have been given at the last two regular preceding meetings (Signed)

A. J. Hatch, G. C. Fowning, J. S. Shoemaker, G. E. Hall, J. C. Lewis, W. L. Knox, A. H. Barnes, J. S. Gilson, J. A. Larncomb, J. B. Williams, J. G. Reburn, H. W. Barlow, J. L. McFarlin, Wm. Webster, J. H. Kinkaid, H. C. Toombs, W. L. Knox, W. M. Boardman, G. W. Avery, T. K. Hymers, G. W. Cunningham.

It was moved and carried that all signers of the Constitution at this date be considered the organizing members.

It was moved and carried that a Committee of three be appointed by the Chairman to report a code of by-laws at an adjourned meeting. The Chairman was subsequently elected to the Committee. The Chair appointed J. B. Williams, J. S. Shoemaker, and W. L. Knox.

It was moved and carried that when the meeting adjourns it be to next Saturday evening at 7 o'clock, to perfect the organization by election of officers, adoption of by-laws, etc. The meeting then adjourned.

TOWN SITES VS. MINING CLAIMS.

The town of Silver City, in this State, made application to the General Land Office to reserve to itself aside a pat at issued to the Santa Comstock Gold and Silver Mining Company, for a claim on the Comstock lode, because said claim covers a part of the town site of Silver City. The Commissioner decides that, as there was nothing irregular in the patent, it cannot be recalled; and this decision settles, so far as the Land Office can settle it, the principle that a mining claim may be legally patented, even if it covers a part or the whole of a town site.

A Prescott, Arizona, man offers to sell out to the tune of forty or fifty million dollars, as may be needed by the Government, to complete the purchase of the northern part of Mexico, provided the Government in turn will deed to him the Santa Uta mine, twenty miles from the city of Chihuahua. The gentleman is reported to be quite wealthy and knows what he is about. The property referred to is said to be one of the richest and most extensive mines in the world.

PRESIDENT GRANT and Secretary Belknap have ordered Dr. Linderman, Superintendent of the United States Mint, to coin appropriate medals of the cannon captured during the Mexican war for the purpose of presenting one each to the veteran soldiers of the Mexican war who may congregate at Philadelphia at the Centennial celebration, July 4th, 1876.

The Idaho authorities have decided to prosecute polygamous Mormons residing in that Territory. There are a large number of Brigham's followers there, and some of them have four or five wives each. Eighteen indictments for polygamy have been found in one county of Idaho.

General Sutter in Old Age.

To-day, says a Washington correspondent, I saw old General Sutter, on whose land gold was first discovered in California, stepping on a car on the avenue. A more pitiable instance of great old age, uncompensated and neglected, I never knew. It was in his mill men near Sacramento the precious gold was first seen by Americans. He is a native of Switzerland, but went to the Sandwich Islands to cultivate oranges, and thence to the Pacific coast of America, where he took a large tract of land under a Mexican grant, with the hope that the United States would some day stretch out to him. But it came, like Jupiter to Dana, in a golden shower, and the rush of miners trampled over his fields, killed his herds, and made desolation in place of the fair estate they had found. From this discovery came the most enormous tribute nature ever paid to man. The present year's yield of gold in California can not be less than \$100,000,000 in specie, and while this immense treasure of wealth has been flowing for more than a quarter of a century, and great merchants and bankers have been made by its possession, poor old Sutter, on the brink of the grave, is unable to find an ear in which he can tell his story. He is now more than 80 years of age, and lives in a little cottage at Litz, Pa., where he is educating his grand children at a German school. The whole world has been exercised by Bulster's fate and Floi and O'Brien's fortunes; yet here is a man at the source of this mighty romance with scarcely a place to lay his head. He is a kindly gentle old person, who has passed his agonizing morning there will be an announcement of his death, and then he will be laid away to rest.

Hollings in Hobbs.

A correspondent of a St. Louis paper, writing from Babylon, gives an elaborate description of Montmorency, the country seat of the English branch of the Rothschilds. The vases, statuary, and other establishments and furniture of the great entrance hall alone are valued at \$1,000,000, while the rest of the mansion is furnished with like costliness. The furniture of single bed rooms cost \$150,000 each, and of the dining-room \$1,000,000. The house is so large that it took the correspondent three hours to pass through the rooms without stopping in any one of them, and the whole is alleged to surpass any other establishment of the kind in Europe, even royal and imperial palaces. And what supports all this luxury and extravagance? A very large share of the means that sustain it is drawn from the hard earnings of the American people. The Rothschilds have trod their already immense wealth since they began to deal in United States bonds and forced the entire financial system of this country into their hands, where they hold it as in a vise, turning on the screws whenever they want some more blood money.

Gen. Geo. B. McClellan, who is now living in Baltimore, will probably be appointed to a lucrative, easy position to the service of the Baltimore and Ohio Railroad Company, with the title of general superintendent or general manager.

ILLINOIS pays more internal revenue than any other State in the Union. New York comes next, and Ohio is third. Dakota is the lowest down on the list, paying only \$10,619 18.

The State debt of California on the 1st of November last was \$4,201,656. This however is reduced to \$1,033,351 after deducting State bonds held by the Educational Department and money on hand.

The most popular bill the present California Legislature could pass would be to enact a statute of limitation against the reappearance of long-lost husbands.

The Colorado gold and silver mines are reported to be in a flourishing condition. This year's yield, it is said, will be about \$7,000,000, against \$5,312,000 in 1874.

In large cities it is not difficult to make a fine appearance in the world at a comparatively trifling cost. In New York there are several stores devoted to the renting of dress goods. Swallow-tail coats made up in the latest style, can be obtained for a night for \$2 50. The patrons of such establishments are often well-to-do men who are too mean to incur the expense of becoming the possessors of a fashionable suit. When the clothes thus hired out become too shabby for respectable wear they are sent at low figures to dandified men. There are also establishments in New York where ladies can hire an elegant outfit for an evening for \$10 and less. Such is fashion in the city in this country.

The Promptitude of Debtors.

The following remarks from an eastern paper are very appropriate at this time. We give it without comment, as it speaks for itself:

Last week a man stepped up to us and said he would pay every cent he owed if he lived till Saturday night. We presume that man died. Another said he would pay us in a day or two as sure as we were born. Query—Did the man live or were we born? Another said he would settle his bill as sure as shooting. We asked to the conclusion that shooting is decidedly uncertain. Then a number said they would pay us to-morrow. These men have been blind ever since, or else to-morrow has not come. One man told us six months that he would pay us as soon as he got some money. That man would not tell a lie, and of course has not had a cent since. But the experience of editors is about the same all over. Last year we stopped a man's paper who owed for six years' subscription. He was serving the public, and we met him while in the discharge of his duties. He averred that as soon as he got through and received his pay he would make it all right. He told us the same story in the Spring, and we presume he is still at work. Another came all the way, five miles, to town, to assure us that he was all right, and we need not fear. He would have some money soon, and would pay—yes, he would. Some time later we 'saw' his money at a distance. He was putting it in a bank. This was the last glimpse we had of it. He never had a batchet and ran around looking cherry trees, or they would have died without anybody knowing who killed them. Another would pay us after sheep slaughtering. His sheep are long wools, and it takes a long time for the wool to mature. Another would pay after wheat harvest, but his wheat, like the century plant is of slow growth and don't ripen often. Another had poor health but was improving. He would get round so in a reasonable money and pay. He has had a relapse, for though he eats hearty and works hard, he don't get 'round' worth a cent. We would have hopes of getting even with such folks some day, when an administrator is appointed, if they had anything to administer on, but they haven't, and—and"

A New York merchant has been detected measuring thirty four inches to the yard. Two inches is nothing on a towel, but it tells heavily on a wooden shirt when the thermometer drops down.
